2.If a security window comes up;click the **Allow** button

3.Click on the FileZilla version that has the .exe extinction on it

Package	Release (date)	Filename	Size (bytes)	Downloads	Architecture	Type
FileZilla						
Latest	2.2.31	(2007-02-28 03:54)				
		FileZilla_2_2_31_dbg.zip	7008753	2960	i386	.zip
		FileZilla_2_2_31.md5	234	705	Platform-Independent	text
		FileZilla_2_2_31_setup.exe	3453207	23839	i386	.exe (32-bit Windows)
		FileZilla_2_2_31_src.zip	2379493	482	i386	Source .zip
		FileZilla_2_2_31.zip	4635779	3294	i386	.zip
Totals:	1	5	17477466	31280		

5.A **Download file** window will appear

In some instances Windows will block this window;if this happens do the following

1.Hold down the **Ctrl** button on your keyboard and repeat step 3

the window should then appear

6.Click **Save**

7.A **Save As** window appears

8.Look to the left for the desktop icon and select it

9.You will then see your computers desktop

10.Then click **Save**

11.The download will then start

12.After the download has ended;minimize or close your internet browsing window

13.Look on your desktop for the FileZilla_setup.exe file

14.Double click on the file

15.The **License Agreement** window comes up

16. You will want to click next until you come to **General Settings**

17. You will then click **Install**

18. After **FileZilla** installs it will place the **FileZilla** icon  on your desktop

19. You can throw the FileZilla_setup.exe file away

Setting up your FTP and using FileZilla

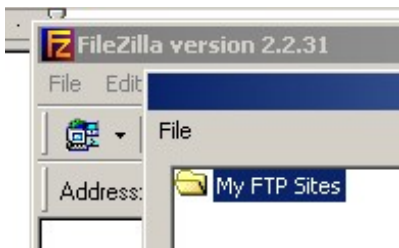

1. Start **FileZilla** by clicking on the FileZilla icon 

2. On the menu bar select **File**

3. Then select **Site Manager**

4. The **Site Manager** window appears

5. Under the File section of the **Site Manager** window; click on **My FTP Sites**

6. Then at the bottom select the  button

7. A **New FTP Site** will appear under **My FTP Sites**

8. Then type in **LCL**

9. Then in the **Site Details** section you will need to fill in the appropriate information

10. A screenshot of the 'Site details' dialog box in FileZilla. The 'Host' field contains '66.255.59.130' and the 'Port' field contains '21'. The 'Srvtype' dropdown is set to 'FTP'. Under 'Logontype', the 'Normal' radio button is selected. There are empty text boxes for 'User' and 'Account', and a 'Password' field. A 'Don't save password' checkbox is unchecked. A 'Comments' text area is at the bottom. The 'Default site' checkbox is checked.

11. Your information should be as follows

Host:66.255.59.130

Port:21

Server Type:ftp

Logontype:normal

user : supplied by the email sent by Luck Color Lab

Password: supplied by the email sent by Luck Color Lab

12. Then select the  button

Your FTP should work now and if it does not feel free to call or email tech support
