

Installing Luck Color Lab Studiomaster Products

The Luck Color Lab Studiomaster Products Download contains the different products offered by us.

Downloading Luck Color Lab Studiomaster Products

1. Go to www.luckcolorlab.com
2. Click on the **Downloads** tab
3. Look for section titled **Current Studiomaster Products**
4. Click on **Current Studiomaster Products**
5. A **Download file** window will appear

In some instances Windows will block this window, if this happens do the following

1. Hold down the **Ctrl** button on your keyboard and repeat step 4
the window should then appear

6. Click **Save**

7. A **Save As** window appears

8. Look to the left for the desktop icon  and select it

9. You will then see your computer's desktop

10. Then click **Save**

11. The download will then start

12. After the download has ended; minimize or close your internet browsing window

13. Look on your desktop for the Current StudioMaster Products.exe file

14. Double click on the file

15. The **LCL Products Extractor** will appear

16. Click **OK**

17. After the extraction completes a folder named **Downloaded LCL Products** appears on your desktop

18. Open Studiomaster Pro

To install Luck Color Lab Studiomaster Products:

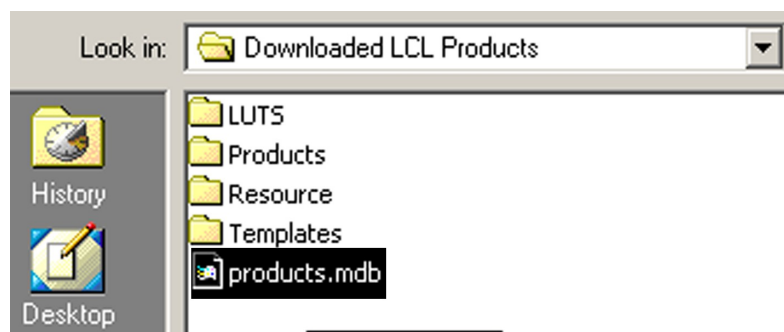

1. Select Setup > Lab Data from the Studiomaster PRO menu bar. The Lab Database Setup screen appears.

2. Click [...] (**the button on the end**) . The Data Location screen appears.

3. Look to the left for the desktop icon  and select it

- 3a. Locate and find the **Downloaded LCL Products** on your desktop

- 3b. Open the folder and locate the **products.mdb** file (not the folder)

4. Click **[OK]**. The Data Location screen closes and the appropriate drive location appears on the Lab Database Setup screen.
5. Click **[Load Data]**. The Pro Lab Products are copied to your system.
 - 5a. You will see information appear in the gray rectangular area below the **[Load Data]** button
 - 5b. When the copy process nears an end two windows will appear
One asking if you want to **Replace, Merge, or Ignore**
 - 5c. You will select **Replace** for both cases
 - 5d. When the copy process is complete, the Set Up Template Groups screen appears.

Setting Up Template Groups

6. Select one of the group tabs on the right of the screen.

Note: If you want to create a custom group name, click [Add Group]. A new tab appears. Type the new group name on the tab. To delete a group, click on the group tab and click [Delete].

7. To reposition the group tabs, click on the tab name and drag it to the new position.
8. Select and drag the templates you want to place in the group from the left side of the Set Up Template Groups screen to the empty area on the right. These templates will be available in the selected group from within Studiomaster PRO.
9. Repeat steps 6 and 7 for the remaining templates and groups.
10. When complete, click [OK]. The Set Up Template Groups screen closes.
11. Click [Done]. The Lab Database screen closes and your changes are saved.

Note: If you delete any templates from the left of the screen, they are completely deleted from the system. To recover the templates, reload the products from the CD.

To delete a template from the system:

1. From the Set Up Template Groups dialog box, select the template.
2. Click [Delete Templates]. A dialog box appears asking you to confirm the delete.
3. Click [Yes]. Another confirmation dialog box appears warning you that if you want to use the template in the future, you will have to reload products.
4. Click [Yes]. The template is removed from the application.
